

VOSS INDUSTRY A/S

WELCOME

For more than 20 years Voss Industry A/S has successfully served our customers in the industry and medico sector by supplying components in both metals and plastics.

Through the years we have developed a devoted base of certified highly specialized suppliers worldwide enabling us to create value for our honored customers -

Value in the sense of **offering high quality items at very competitive prices and fast delivery**

Our purchase and quality departments are daily in contact with our selected suppliers to ensure that our customers' demands and standards of quality are being maintained in the production. Time is money and by having our own representation and quality inspection located in the Far East we are able to minimize unnecessary loss of valuable time.

Most of our customers prefer that we manage all freight and hold stock for them at our location in Herfølge just south from Copenhagen- securing a fast day to day delivery of items.

At Voss we do not believe in a short fix – we are in the game for the long run and most of our customers we have worked with have been customers for more than 5 years.

We are proud working with you and look forward to continuing our collaboration in the near future.
